Note.

Bathing Ghat at Srirangapatam.

I have gone through the papers available here at myself, regarding the new Bathing Ghat and connected works which are now under construction at Srirangapatam. The works consist of :—

		Rs
(1)	Bridge estimated at	10000
(2)	The mantap	3160
(3)	The Ghat	13500
	Total	57-111

(The above figures

taken from the Dry Concrete

built.)

There are also 2 Chutes,

to be built, midway between

the river and the Batching

Plant. The work of one of

these buildings has made

considerable progress and

the other one has not yet

been taken up.

As regards the Plant-

works, the "Bridge" has

been practically completed

and the foundation for

a mountain is being excavated

Gradually the stones for

the steps are being gathered by

On the 23rd December 1907

the

The Deputy Commissioner of Mysore (Mr. Ramaniya Iyengar) submitted a Note to the Dewan, stating that on an Inspection of the works, he thought that the works were not appreciated by the people and their further progress required consideration. He also suggested certain alterations in the proposed works.

The Dewan on the 24th December 1901 was pleased to refer the matter to the Secretary P. W. for favour of his views on the suggestions

by the Deputy Commissioner
and also directed that
the Dy Commissioner should
Consult the people's wishes
and Convenience and
send a full and final
report in the matter. The
Dewan directed also that
further progress on the works
be stopped for the present.

The Chief Engineer
and Secretary P. W. has
thereupon forwarded Copies
of reports from the Superintending
Engineer Western Circle,
the Executive Engineer
(Mr Molloy) and Asst
Engineer (Mr Dayaprapaya).

The Chief alteration

alteration proposed by the Deputy Commissioner was that the manhole on the Bathing Ghat should be built in the mid stream where alone water flows during the hot weather. To this, objection was taken by the Engineering Department on the following grounds :—

(1) Extra cost, as the manhole will have to be built at a level higher than the highest flood mark, as otherwise the building will be under water for six months in the year.

(2) The building will stand right in the centre of the river exposed to danger during freshes.

(3) The Course of the river will be interfered with and the running water will scour the opposite bank and eventually endanger the safety of the Railway bridge above.

For the above reasons the Engineering authorities are of opinion that the first work may be carried out without making any alteration in the plans, and that arrangements may be made at a small extra cost—

for slightly diverting the flow of the river so as to ensure a constant flow of water over the bathing shoal now under construction.

The Deputy Commr and myself inspected the works again on the 12th January 1902 and the Dy Commissioner agreed to the arrangement referred to in the preceding paras. This written reply to Mr Abel's address to the Superintending Engineer was received yesterday from the Chief Engineer.

The Dy Commr says that the town's people [illegible]

agreed to the proposed
arrangement on the under-
-standing that by building
a dam and by blasting
rocks in the bed of the
river, a constant stream
of water near the bathing
ghat will be ensured
even during the hot-season.
It is reported by the
Executive Engineer that
a survey of the rivers
for purposes of the diversion
is being made and an
Estimate therefor is being
prepared.

If the Govern is pleased
to decide that the ghat-
works should, under

these

these circumstances be proceeded with, these orders have to be passed on the Chief Engineer's request to be given an allotment of Rs 50,000 for the current year. A provision of 50,000 Rs. is made in the current year's Provincial Budget on account of Monuments and Charitable Grants in memory of H H the late Maharaja. I think an allotment of Rs 25000 may be sanctioned. I ascertained from Mr Durgaprasanna al-Sarangi - [illegible]

would be sufficient-
for this year.

In this connection
I would suggest that-
the Chief Engineer may
be asked to value the stones,
pillars &c which the Engineering
Department is taking
from the Narasimhaswami
Temple for use at the
Ghat works, so that it-
may be considered later
on whether the temple
should be reimbursed
the cost thereof.

Dewan's Orders

The question of this Bathing Ghat requires studious consideration and

progress may be stopped for the present.
I shall be glad to be favoured with the
views of the D P. W. on the suggestions
now made by the Deputy Commissioner.
When I visited this locality a few months
ago it seemed to me that the people were
not very keen about it. They seemed to
prefer the bathing ghat the improvement
of which is now suggested by the deputy
Commissioner. He may be asked to Consult
the peoples wishes and Convenience and send
a full and finial report in this matter.

Dear Mr Molloy

Referring to our inspection of the bathing ghat at Srirangapatam on the 12th Instant, will you kindly let me know clearly what your objections are to the adoption of the course suggested in my inspection note of the 23rd ultimo.

Hoping you are doing quite well

I am Sir

(sd) H Ramanujiengar
Dy Com.rs

Dear Mr. Duggappayya

Please bring up later on at your convenience.

Yours Sincerely

(sd) Harry J. Molloy
18 1 02

Dear Sir,

The question as regards the situation of the Mantapam and Bathing Ghat at Srirangapatam was discussed on the spot in company with the Dy Com.rs Mr Ramanujiengar, amidar

of Srirangapatana, and some leading men of the place. The matter was threshed out in all its different phases in consultation with the views of the people, and the conclusion arrived at was to stick up to the Sanctioned proposals dependent on the diversion of water in the river so as to pass by the side of the Ghat.

The objections raised and discussed with regard to the proposals put forth by M. Ramanujiengar were as follows:—

1. Removing the Mantapam far into the bed of river will lead extra cost owing to raising of the floor above the highest flood mark to give access to it. Besides this the

Mantapam will stand right in the Centre of the river exposed to danger during freshes

2nd By locating the Mantapam as said above, the course of the river will be interfered with which will end in scowing the opposite bank and eventually endangering the safety of the Railway bridge above.

3rd If the Mantapam floor is made lower in level it will be of very little use to the public since it will be under water during six months in the year at least.

Thus the changes suggested by the Dy Com.r were abandoned both on the technical and financial difficulties. The Dy Com.r Mr. Ramanujiengar was asked to send in a Minute— Keeping in view the discussion

that took place and which it is hoped will be done now at least

Sam te
(89) S N Duggappayya
Asst Engr: 19.1.02:

My dear Mr. Ramanujayyar

Herewith our objections to proposals for altering side of Mentappan and that As I have already told you it is quite a simple matter at very little extra cost to ensure a running stream in front of that wall.

Yours sincerely
(89) Harry J Molloy
Ex Engr.

Dated 29th January 1902
No 210.

Adverting to your docket No
15 of the 3d January 1902 forwarding
Copy of Dewan's orders on my inspecto
note dated 23d December 1901 on the Ba
ghat and Connected works at Seringa-
patam, I have the honor to State that
I have again inspected the bathing ghat
in Company with Mr. Molloy, Executive
Engineer, of the French Rocks Division an
discussed the subject with him and the
Canara people in all its aspects on the
spot. The Executive Engineer is of
opinion that the shifting of the site of
the Mantapam to the mid-stream as ex-
formerly proposed by me in Connection
with the works of the proper is no

without an expenditure of money far in excess of the sanctioned estimate. It is unnecessary for me to refer to his other objections, as the above difficulty is alone sufficient to veto the above proposal. On my explaining the case again to the towns-people they have waived their objection to the present Mantapam site on the assurance given to them by the Executive Engineer that by running up a deflecting dam and blasting the rocks in the bed of the river a running stream would be ensured at the existing bathing ghat even in the hottest part of the year.

I have &c

Sdy D[redacted] Mcrae
Campbell Col:
Secretary to Govt PWD

(Dewan's Order)

This has become a Complicated and costly matter and I think I must inspect the place once more before deciding the matter finally -

The Chattram on which so much money has been spent may be completed. The ~~Budgeted~~ Bridge work may be so far completed as to be made fit for use The other Dharmasala or Moosafarkhana

mxy

be kept in abeyance as also the Ghat and the mantapam work. I am not quite convinced of the utility of them or their position I shall decide this matter when I next visit Mysore.

But the stones, pillars &c which the Engineering Deptt is taking from the Narasimhaswami Temple for use at the Ghat works &c must be valued so that it may be considered whether the Temple should be reimbursed the cost thereof. The Temple is in urgent need of repairs which must be executed to prevent further collapse which has been allowed to go on certainly, if what the late Dewan has stated is correct for more than 130 years:

In reply to his No. 348 dated 15th January 1902

SUBJECT.

Requesting early orders in re the adjustment of the expenditure incurred for Constructing the Bathing Ghat Masklap & Chattram at Srirangapatanam

References (to be entered only in the Dewan's Office).

Bathing Ghaut and Chattram at Sreerangapatam

In the late Dewan's printed memorandum dated 13th December 189 the construction of certa works was sanctione in memory of His Highness the late Maharaja, Sri Chamarajendra Wadiar Bahadur, G. C. S. I.

Among them, the following related to the Muzrai Departmen

(1) Dharmasala at Calcutta at the place of cremation ... Rs 30,00
(2) Chattram at Lower Tirupati ... " 10,00
(3) Chattram and Bathing Ghat @ Seringapatam " 60,00
(4) Temple at Mysore ... " 100,00

the Dharmasala at Calcutta, there is separate voluminous correspondence which will not be referred to in this note.

No. (2), the Chattram at Lower Tirupati, is under construction under the supervision of the Dharmadarsi of the Tirupati temple. An estimate for Rs 11,000 was sanctioned for this work. Subsequently, a large house was purchased for Rs 3000- and alterations are being made therein and a set of rooms being built on the upper storey. The total cost comes to Rs 7000. The work is proceeding, and

moneys are being advanced from this Office from time to time as the work proceeds. This building will provide accommodation only for a small number of the higher class of visitors. It is therefore the intention to build another set of rooms in the Compound for the ordinary class of pilgrims who find much difficulty in getting accommodation at Lower Tirupati.

No. (4). Temple at Mysore. This work has not as yet been taken up. There seems to have been doubt as to the nature of the Edifice to be erected. [illegible]

who was requested to frame a design, felt certain doubts and difficulties and expressed his inability to decide upon a design, but he recommended the adoption of the plan of the old Halebid Temple as being free from objection. The matter was allowed to drop and the reference which was received through the Chief Engineer, ordered to be filed.

{ Chief Engineer's No. 5227 dy 21/10/97

As regards No (3), Chatram and Bathing Ghaut at Seerangapatam, ~~Sir~~ Sir Sheshadri Iyer wrote as follows in a memorandum dated

dated 14th October 1895:—

"Much has been done in recent years for the repair and restoration of the famous temples of this place (Seringapatam) The work has commanded universal appreciation and as an attempt to redress the neglect of 130 years will be a standing monument of His late Highness's reign A separate proper building for a Chattram a Commodious Musafirkhana and a Bathing Ghaut on an appropriate scale are required to complete the good work already [illegible]

carried out by His late Highness, and they will add largely to the convenience of the numerous pilgrims and other travellers who visit this celebrated place."

The late Dewan further considered that the Mantap in which the Government Chatram was now held was insufficient and otherwise unsuitable, that the new Chatram might be erected on the site of the Palace built in the early years of this Century, and that the proximity of the river to

the new Chattram would b
a great public boon.

The Bathing Ghaut
opposite the site being in
a condition of utter
neglect, and the unbridged
Channel in front of the
river a source of danger
to men and cattle during
floods, Sir Sheshadri Iyer
thought that the Channel
should be either bridged
or filled in, and two or
three flight of steps
built to the river with
Mantaps for the convenience
of bathers.

Subsequently, it was
decided that [illegible]

buildings were required
on account of the Chattram,
one for the use of the ordinary
Class of travellers and the
other for respectable people,
that the building used
for the Sandal Koti (which
last would be removed to
Mysore) might be altered
and adapted for the purposes
of a Chattram for the ordinary
Classes and a new building
Constructed close to it for
the use of the respectable
Classes. The Construction
of a building for the
Sandal Koti at Mysore
not having been undertaken,
the question of altering
the Sandal Koti at Seringapatam
into a Chattram, has been

been left in abeyance.
But the works connected
with the other (new) Chattram
and the Bathing Ghaut
are being carried out
by the P. W. department.
An Estimate for Rs 71,923-
has been sanctioned for
these works, but from
the Palace Executive Engineer
(Mr. Aiyasami Iyer's) reports
dated 25th February 1899
and 31st August 1899 it
appears that the Bathing
Ghaut is estimated at
Rs 64,832---
the bridge across the Channel @
Rs 13,470---
the new Chattram @
Rs 26,000---
The latter Estimate

seem to have been reduced to Rs 71,923, by the Chief Engineer.

The Chief Engineer has applied for authority to the Comptroller to accept debits to the extent of Rs 10,000- spent during the past official year on account of the above mentioned works This may be sanctioned. I understand that funds required for the current year will soon be applied for. A provision of Rs 50,000- was made in the Budget for the last year, and the same has been repeated this year.

It is observed from the correspondence that the stone mantaps round the Sri Lakshmi Narasimhaswami have been dismantled by the P. W.
and that the stone pillars beams and slabs thereof are being utilized for the Ghaut work, and that provision for the cost of such stones has not been made in the Estimate for the Ghaut work. There is no written record in this Office granting permission to remove the stones of the temple for the purposes of the Ghaut

seem to have been reduced to Rs 71,923, by the Chief Engineer.

The Chief Engineer has applied for authority to the Comptroller to accept debits to the extent of Rs 10,000- spent during the past official year on account of the above mentioned works This may be sanctioned. I understand that funds required for the current year will soon be applied for. A provision of Rs 50,000- was made in the Budget for the last year, and the same has been repeated this year.

was due to the fact that there was no such Convenience near enough to the temple, that Paschimavahini insanitary was becoming ~~[illegible]~~ and that the Ghaut was intended not only for the use of the General public but also of the Royal family. The proposal to have two Ghauts was also with the object of providing accommodation for the Royal family on the occasions of their visits to Sreerangapatna.

Sd/- to the Dewan.

17/8/01

Get the P. W. Estimate & then we will take up the subject. Before I deal with Mrs Swamy's also a statement of the cost already incurred & the authority under which the Mandapam in Nava-Brindha Swami Temple was removed.

17 VIII 01 Asst. P. J. O. Note

Note continued :—

The orders of the Dewan, dated 17th August last, were communicated to the Chief Engineer, who, in reply, states in his letter No. 5247 dated 25th September 1901, that the Executive Engineer, Palace Division proposed in 1900, to utilize for that work, the stone mantaps of the Sri Lakshmi Narasimha Swami Temple, and that the late Dewan Sir Sheshadri Iyer inspected the Temple

XR+

and proposed that these mantaps might be dismantled and used in the construction of the Bathing Ghat referred to.

Except the entry of Rs 1000/- provided in the sanctioned Estimate for dismantling these mantaps and removing the stones thereof, there seems to be no other written authority granting permission for the same

The Chief Engineer states that out of Rs a sum of Rs 68/-

been already expended on this item.

And, as for the total cost already incurred on the construction of the Bathing Ghat, the Chief Engineer reports in his No. 4889 dated 3rd. September 1901; that the actual outlay incurred on the work upto the end of last official Year is Rs 9,967/- against the Sanctioned Estimate of Rs 71,923/-. He now requests that the Comptr.

Comptroller may be
authorized to accept
debits to the extent of
Rs 50,000/- during the
current official year.

The whole file of
correspondence has also
been received as required
submitted to the Dewan.

Rs
17/10/01

17/10/01

Note continued :—

When the dewan
inspected the memorials
at Sreerangapatanam
on the 26th June 1902,

notice that works to the extent of Rs 29,000/- had been actually carried out this sum was cleared* & the Govt. Compt. authorised to accept debits to that extent.

* Pro: no 2141-3 Mun 7696 dy 20th June 0.

The Compt. in his letter no 1594/296 dy 20th Sept. 02 stated that a sum of Rs 20,847-14-1 debited by the D.P.W. Examiner in connection with the works had been adjusted against Rs 29000 referred to above, and as the balance of the grant Rs 8901-02 had lapsed

copied, be requested to be informed whether any further outlay which may be debited by the Examiner in the accounts for 1902-03 can be admitted by him if so to what extent.

The chief Engr. was written to in the matter.

Meanwhile, the comptr. again informed this office that a sum of Rs 1326/- had been debited by the D. Pr. Examiner for Jul. 1902 & that pending formal Govt. sanction, the amount

This office no. 757 of 24. x. 02.

No. 2249/435 of 3. xi. 02.

adjusted in his accounts
for August 1902

The Chief Engr. was
again asked whether
this amount had to be
accepted by the Govt Dept to.

//

In reply to the two
foregoing Communications,
the Chief Engr. ~~XXX~~ in
his present letter, states
that Rs 20,847-14-1 is the
value of the actual work
executed during 1901-02
& that no additional
expenditure was incurred
during that year. He
further says that the
total expenditure
including that incurred
during

No. 6551 dy
13-11-02

during 1900-1901, up
to end of June 1902
Rs 30,848. He
that Rs 20,000/- will
required for expenditure
during 1902-03, & request
sanction of Govt. therefor
As regards the expenditure
of Rs 1,826 rep^d to by
the Comptr. he also states that it will be
a charge against Rs 20,000
now applied for.

In regard to the
Dewan's remarks recorded
on the D.P.W. Secy's O.M.
dy 3rd July 1902 (copy is
in this file) that the
Rattnies shall should
be reduced to half-
original

the proposed mantab
over it- should be dispensed
with & the savings thus
effected be utilized
renovating the Sri
Lakshmi Narasimhaswami
mple, the Ch: Engr:
states that a modified
project is under preparation
& that the same will
be submitted soon-

/

Seringapatam –

1. Much has been done in recent years for the repair and restoration of the famous temples of this place. The work has commanded universal appreciation and as an attempt to redress the neglect of 130 years, will be a standing monument of His late Highness reign. A separate proper building for a Chattram, a commodious Musafarkhana and a bathing ghat &c.

an appropriate scale are required to complete the good work already partially carried out by His late Highness and they will add largely to the convenience of the numerous pilgrims and other travellers who visit this celebrated place

2. The mantap in front of the Narasimha swamy temple where the Government Chattram is now held is insufficient and otherwise unsuitable.

3. The most appropriate site for the Chattram is the one on which stood the Palace built in the early years of this century. This Palace

was pulled down a few years ago and the materials used for other purposes. A Chat-bram upon this site in memory of His late Highness will be a most appropriate memorial and in itself a most useful public Charity. The proximity to the River of a Chattram on this site will be a great public boon

4. The bathing ghat opposite this site is in a condition of utter neglect and the unbridged channel in front of the River is a source of danger to men & cattle during floods. This channel

should be either bridged or filled in and two or three flights of steps should be built to the River with mantaps for the convenience of bathers.

5. The Southern corridor of Narasimhaswamy's temple should be converted into a Musafarkhana for the accommodation of all Hindu travellers and the Northern Corridor set apart for the use of Bhyragis

6. The works specified above should be carefully designed and estimated for. The total cost may amount to Rs. 20,000 or 30,000.

M. Kavi, M Sita-
ram Rao, M. Srinivasa Charlu
and M. Standish Lee should
study the requirements from
every point of view and sub-
mit suitable designs with an
estimate of cost. On receipt
of this estimate the needful
funds will be duly provided
A competent subordinate -
should be deputed to super
intend the execution of these
works out of the repairs to the
Narasimha and Gangadhara
temples, regarding which
separate instructions

file been issued.

hs

Memo.

I Visited Seringa patam on 10th October 1895 accompanied by the Inspector General of Police, Deputy Commissioner, Mr. Kavve and m Sitarama Rao: Mr. Inman Could not be present as he was absent at Bangalore

2. The public road near the Maharaja's ghat at Paschimavahini should be widened so as to avoid the present sharp curve, as pointed out by me to the Executive Engineer

The driving road to and from the Breach, made for the previous Viceregal visits should be repaired and put into order for use during the approaching visit of His Excellency Lord Elgin and handed throughout. It would be sufficient to re do the central 12 feet, leaving the sides under grass. The Railway authorities should be requested to provide on this road two level crossings with suitable gates, to be kept closed and locked except when required

for actual use. A wicket will suffice for ordinary visitors. If the level crossing for a carriage is inconvenient on the South, let the one on the North at least be made at once.

4. The extensive grove attached to the temple of Ranganathaswami should be properly levelled and provided with iron railings, as pointed by me. The work is an important special improvement.

5. The temples of Narasimhaswami and Gangadhareswara Swami should be repaired and improved in the manner

pointed out to Mr. Karve. The requisite funds will be provided from the Muzarai Department. I would like the D. P. W. to prepare the project

6. A portion of the Northern corridor of the Narasimhaswami Temple should be converted into a few shops, say 7 or 8, and the South wing to a Musafirkhana as pointed out to Mr. Karve. The work should be carried out by the D P W

7 The Public offices

the Taluk cutcherry

the Munsiffs' Court, the Sub-Registrar's office, present Anna-

Chabrain &c.) should be in
a single block with defined
limits as pointed out to me
Karré, and the cross-road
on East of Mussiff's Court
to be shifted to the West of it.
This arrangement would enable
us to deal finally with the
proposed restoration of the
Zalak Cutcherry.

8. The approach to the
Gunjam gate should be
straightened.

9. A portion of the
Fort wall near the Jumma

masjid is very unsightly and should therefore be dismantled, the spoil being used for the purpose of filling up a portion of the Fort ditch close by

10. The approach to Ranganathaswami Temple and the ground in front of Gangadhareswara Temple and close to the backyards of houses should be planted up as personally instructed. This should be undertaken by the Municipality

11. The limits of the premises of the Seringapatam Railway Station should be Verified and properly demarcated on the ground.

12. The Deputy Commissioner should enquire into and report upon the existence of private interests, if any, in the land between the Railway and the Fort wall on the west

13. In the Western Extension (near Pleader Subba Rao's house) roads should be properly laid out and drain excavated before sites are allotted for building purposes.

Mr. Shandish Lee should pay
a very early visit to Seringa-
patam and see that this
work is soon put in hand
14 The sites by the
side of the Sandal Kote should
not be built upon, but should
be presumed and reserved
for public purposes. The
Brahmins who assert an
interest in these sites may
be paid a reasonable com
pensation, not exceeding Rs. 545,
which is the amount they
are understood to claim
These people may be given

other suitable sites for a fair price in the extension near Pleader Subba Rao's house

15 The Brahmins of Nowl Krishna Das' Agrahar should likewise be given sites in the aforesaid extension for a fair price.

16 The Daria Dowlah repairs should be completed as quickly as possible

Sir:-

Referring to our interview recently with the Dewan, I have the honor to forward herewith the two plans of Bathing Ghaut proposed to be built at Seringapatam in Commemoration of His late Highness.

I have the honor to be
Sir
Your most Obedient Servt

Sanitary Engineer
with the Govt of Mysore

Construction of a Bathing Ghaut and 2 Chattrams at Sree-rangapatam in memory of H.H. the late Maharaja Chamarajendra Wodayer Bahadur.

As regards the Bathing Ghaut, Mr Standish Lee has this day sent me two plans which, I beg to submit herewith. No estimate therefor appears to have been prepared yet. If Mr. Lee's services cannot be spared for this work, I should then request the Chief Engineer to entrust the construction of the Ghaut to Mr T. Inman, Executive Engineer of French Rocks.

As regards the Chattram two buildings have to be constructed - one for the use of ordinary travellers and the other for respectable

I learn that the Sandal Koti at Srirangapatam is to be transferred to Mysore; in this case the present Sandal Koti building could be converted into one of the Chattrams after making necessary improvements and alterations.

As regards the Con-Struction of the other Chattram, the work could be started at once, but I require the services of Mr C. Suranarayanarao, Supervisor D.P.W. to be placed temporarily at my disposal for the purpose.

Note.

Submitted to the Dewan for orders.

I inspected Sreerangapatam in company with Mr. Standish Lee on the 18th September 1896.

Sri Ranganathaswami Temple :-

The old compound wall all round this temple is out of the perpendicular. In some places it bulges out while in others it overhangs the foundation. There are evidences of dis-placement still con-tinuing as can be seen from the Chunam pointing done some 4 or 5 years ago being [illegible]

and consequently falling off. The old drain on the northern and western sides of the temple outside the compound wall was always a covered one, and the slabs removed from over it during the late excavation are still lying on the spot.

When the temple was built, it was evidently intended that there should be a lateral support from the earth outside the walls. The cheapest and most efficient means of

preserving the
wall appears to be, to
form a broad platform
all round raised
2 or 3 feet above the
level of the ground.
It is believed that
the present excavation
around the compound
wall was made to
facilitate the drainage
of the court yard.
As the drain has not
been cleared of all
obstruction, the excavation
may be filled in
as otherwise it may
seriously injure the
wall by the soakage
of rain water in the
space excavated [illegible]
the foundation

Please do whatever
is necessary for the annual
Muqam - grant by
the Mugam
1/10/26

Nowl Krishna Dass' Agrahar:-

None of the Agrahar Brahmins to whom sites had been allotted have started the work. About 20 servants of the Sri Ranganathaswami temple applied for sites fronting the main road near de Havelands arch. But I understand that these sites had been reserved for bungalows.

Make a plan of allotment & serve it with notice on Trustees

Matter for local authorities

Sandal Koti:-

The timber supporting the present terraced roof

roof has all decayed and the annual charge for maintaining building in good repair will be rather heavy. It is therefore better to dismantle the existing roof and sell the old timber and put up instead a light roof with Mangalore Tiles utilizing the present walls. The new roofing may cost about Rs 12,000; and this building will do very well for ordinary class of travellers.

Approved by

A Chettur

better classes may be built upon the vacant site quite adjacent to the Sandal Koti on the west.

If both can be connected by a passage of same kind, all cooking may be arranged for in the Sandal koti or on a lean-to addition on west of it, & the new chattram in lieu of M.'s name may be retained as residence & made much smaller by

There is also another vacant site at the rear, which may be enclosed for carriages and carts belonging to the visitors at the Chattrams

Bathing Ghat:-

The Taluk Cutcherry road to be extended up to the bank of the river by cutting through the rampart There are a few half-ruined

mantaps on the site selected for the Ghat These mantaps will have to be removed together with a number of Peepal trees standing within a 100 yards of the proposed Ghat. Orders are requested to extend the Taluk Cutcherry road to proposed new Ghat, by cutting through the rampart.

By all means do without trespass upon private rights if any. by

From,

The Muzrai Secretary

to the Govt of Mysore

To,

The Secretary to the Govt

of Mysore. P.W. Department

Sir,

I have the honor to forward herewith a printed copy of the Dewan's Memo dated 12th December 1896 with a note of his subsequent order dated 5th August 1896, ordering the construction among other works, of a Bathing Ghat and a Chattram at Sreerangapatam in memory of His Highness the late Maharaja Chamarajendra Wadiyar Bahadur G. C. S. I.

2.

With refce to the Bathing Ghat, I am desired

by the Dewan to request
You will be so good as
to entrust its construction
to Mr. T. Inman, Executive
Engineer of French Rocks.
I herewith forward for
your reference the two plans of the proposed Bathing Ghaut,
prepared by Mr. Lee; but
no estimate for the ~~work~~ same
has yet been prepared.

3. As regards the
Chattram, the construction
of which will be undertaken
by the Municipal Department,
two separate buildings are
required, one for the use
of the ordinary Class of
travellers and the other
for respectable people.
But the Dewan observed

that of the Sundal Kotta
at Sreerangapatam will
be removed from its
present building
& it may be converted
into one of the Chattrams
after making the necessary
improvements and alterations.
I am directed therefore
to request you will be so
good as to issue instruc-
tions for communication
with the Conservator of Forests
to make over the building
to the Mysore Department
as early as practicable as
the construction of the Chattram
has to be put in hand at once.

4. With regard to the
conversion of the Sundal
Kotta for Chattram pur-

new building for the proposed
Chattram, I am also to
request that the services
of Mr. C. Suranarayanaka,
Supervisor at Nagamangala
may be temporarily placed
at my disposal. But
if as you told me in
person this morning
you cannot possibly spare
his services, I shall thank
you if you can kindly
arrange to place temporarily the services
of ~~some other~~ another experienced
~~subordinate~~ overseer at my disposal
for the purpose and further
instruct Mr. V. H. Karve
Executive Engineer of Kolar
to inspect the works ~~under him~~ while in progress
~~at his convenience~~

I have the honor &c

MYSORE P. W. DEPARTMENT

CENTRAL OFFICE,

Bangalore 18th September 1896.

The Chief Engineer of Mysore,

Bangalore.

To

The Huzur Secretary

to the Government of Mysore.

Sir,

With reference to the concluding portion of your letter No 512 of 7th instant, regarding the conversion of Dandakhoti building at Seringapatam for Chattram purposes, I have the honor to forward the enclosed copy of letter No 22 dated 23rd ultimo, from the Conservator of Forests in Mysore, reporting that the above building cannot be made available until the new Khoti building is constructed at Mysore; and to inform you that the Dandak Khoti at Mysore will not be ready for some time to come, the work not having yet been taken in hand - in fact project for same has not yet been got up. The Executive Engineer Mysore Division will be asked to expedite

it submission

2. Steps are being taken for the preparation of a proposal for the Bathing Ghat at Veerapatam referred to in para 4 the services of Superintendent Junior Assistant Ras cannot possibly be spared, as Forbes already been informed personally, nor is it possible at present to detail another Upper Subordinate exclusively for the works, but the Executive Engineer French Rocks Division will be asked to arrange for the occasional inspection of the works by one of his Subordinates while they are in progress. We have not got a man to spare at present.

I have the honor to be
Sir.
Your most obedient Servant

C Unwin. Colonel.

Chief Engineer

CENTRAL OFFICE,

Bangalore, 30th November 1896.

From

Colonel C. Bowen.
~~The~~ *Chief Engineer of Mysore,*
Bangalore.

To

The Mirzai Secretary
to the Government of Mysore.

SIR,

With reference to your letter No. 512 dated 7th Ultimo, para 2, requesting that the construction of the proposed Bathing Ghat at Seringapatam, as per plans submitted, may be entrusted to a Mr. Inman, Executive Engineer French Rocks Division, I have the honor to forward for your information, the enclosed copy of Docket No. 420 of 28th instant from that Office, and to state that plans such as those forwarded by you (herewith returned), without any details or information to show the class and description of each item as intended by the designer, are useless for purposes of estimating. In such a project, the architect should certainly prepare full sections, description of work, and estimate to enable

any one else to carry out his design and idea.
For practical purposes the drawings are too
incomplete.——

I have the honor to be,

Despatched
Received
General No. 374
Muzrai F. No. 26-96
Enclosure No. 2

Sir,

In the Dewan's printed memo dated the 13th Dec. 1895 regarding the monuments and Charitable grants in memory of His Highness the late Maharaja Chamarajendra Wodayar Bahadur G.C.S.I, it was directed that the construction of the new Chattram and Bathing Ghat at Sreerangapatam should be undertaken in the Muzrai department. But owing to the want of qualified professional hands to supervise

on the same no 4720 d/21/9/97

important works, the Dewan has since decided that they may be carried out in the P.W. department.

2. I am accordingly directed to request that you will be so good as to arrange for the necessary designs and estimates for the Chattram and Bathing Ghat being prepared and the works executed under your orders in the P.W.

The funds assigned for this purpose will be placed at your disposal by the Comptroller to the Govt. of Mysore in due course ~~=~~ 3/. Certain sites required for the construction of the Chattram and for the formation of a new road to the proposed Bathing Ghat at Sreerangapatam have been acquired by the Dy Commissioner of Mysore District under the Land Acquisition Regulations in ~~accordance with the~~ pursuance of the orders of Govt. conveyed in Notifications Nos Camp 5 and 6 dated 12th October 1896, Copies of which are herewith forwarded for your information

The Chief Engineer of Mysore,
Bangalore

To

The Personal Secretary
to Government of Mysore.

Sir,

I have the honor to acknowledge receipt of your letter No 374 dated 14th instant, stating that the Dewan Jour. 4-26-96 has decided that the new Chatram and Bathing ghat at Seringapatam, to be constructed in memory of His Highness the late Maharaja, may be carried out in the Public Works Department, and requesting to arrange for the preparation of the necessary designs and Estimates and the execution of the works.

2. As regards the Bathing ghat, I invite your attention to the previous correspondence ending with my letter No 6305 dated 30th November 1896, and request you will be good enough to forward to me, at your earliest convenience, the plans for the proposed Bathing ghat prepared by Mr. Standish Lee, referred to you with that letter. I should like to

know whether the arrangements proposed in those plans meet with approval.

III. In para 3 of your letter No 312 dated 4th October 1896, you reported as regards the Chatrams, that two separate buildings were required, one for the ordinary class of travellers, and the other for respectable people, and that Mr Dewan had observed that the Sandal Cake building, when vacated, might be converted into one of the Chatrams. I request you will be good enough to inform me whether this arrangement holds good, and whether the project which the Public Works Department is now required to prepare, should be only for the additional mess building.

I have the honor to be,
Sir,
Your most obedient servant
C. Chaloner Colonel
Chief Engineer of Mysore.

Dewan's Memo

of the 13th December 1895

regarding the monuments

to be constructed in

memory of H.H. the late

Maharaja Chamarajendra

Wodeyar Bahadur, G.C.S.I

With reference to the

construction of a temple

at Mysore and of a

Chattram and a bathing

Ghaut at Sreerangapatam

Sanctioned in the above

it was decided, after

some correspondence

between this Office and

the P.W. Department,

that the construction

of these works should be entrusted to the Executive Engineer Mr. Raghavaloo Naidoo.

He has since been transferred to the Chitaldrug District in connection with the Narikanave project and the works have not yet been commenced at all. I would therefore request that the Dewan be pleased to issue instructions for the appointment of a Special engineering Officer solely for the construction of these works in view to their early completion as the question has been

pending for more than 3 years.

14.10.98. Sd/. A Sreenivasa Charlu

Dewan's order on the above.

Transferred to D.P.W.

It is a very great pity that these works have not yet been done. The Muzrai Department cannot do them; please entrust them to E.E. French Rocks as works of another Deptt. Who is the E.E. there? Some specially qualified man may be kept at French Rocks till these works are finished.

Intd/. K.S.

Despatched 27.2.99

Received

General No. 75
No.

Enclosure No. no 8 (as detailed overleaf)

Sir,

I have the honor to submit herewith for your kind perusal, the marginally noted plans connected with the proposed construction of Chattram and Bathing ghat in Seringapatam in memory of His Highness the late Maharajah of Mysore.

II The Chattram will approximately cost Rs 26,000 and the Bathing Ghat, Entrance gate and the arched Bridge will cost about 76,500 and so the total cost of the project for Chattram and Bathing Ghat will amount to approximately 1,02500, Rupees.

III Bathing Ghat: Mr Standish Lee who prepared a plan for the

bored back the Plans of the E.E. with him to forward all connecting papers, therein with the Surveyor's Draw Work & all the Bangalore Town Survey Plans &c &c

Jan 6 3 99.

Endorsed

Enclosures

Plan of Bathing Ghat
Plan of Entrance gate
-Do- of arched Bridge of 6 Span of 15ft:
Tracing plan of Dharma Chattram
Tracing of Survey plan showing the Sites proposed for the Bathing ghat & Chatram.
Longitudinal Section.
Design of Bathing Ghat by Mr. Standish Lee
Survey plan of Side of Bathing ghat prepared by Mr. Standish Lee.

8 Enclosures

Sides 79¼ ft long each, My design being closely similar to the Pachamavahini
That in Paschimavahini Mr. Lee's design, which is also enclosed herewith, is in my humble opinion, not sufficiently long at the sides
the Steps designed having different dimensions for the tread and rise
from those adopted for the existing steps there, and having no protection
at the upper and lower sides by masonry walls, will be shelved from
their protection by the river current.

A plan for the Entrance gate way and a plan
for an arched Bridge of 6 Vents of 15' Span across the small
channel that intervenes are also submitted for perusal.

IV --Chattrams. The Chattrams is designed like Nanja Raja
Bahadurs Chattrams in Mysore and the details will be seen
from the plan and Sections herewith submitted.

V Owing to death recently from plague of a member of my family
I was not able to come to Bangalore and see you in person
to receive instructions, as desired by you I shall try to be there
on and about the 15th of next month and get all the necessary
instructions from you.

Western Circle

Sir,

With reference to your No 3979 of the 29th October 1898, I have the honor to submit herewith for favor of sanction a project estimated to cost Rs 94,822 for the construction of a Bathing Ghaut and a Chattram in Seringapatam in memory of His Highness the late Maharaja Chamarajendra Wodayer Bahadur G C S I. A survey plan shewing the site selected for the Ghaut and Chattram by the Dewan is herewith enclosed for kind perusal.

II Bathing Ghaut – This is designed just like the one at Paschimavahini, but in an improved style. I have allowed the front to be 148½ ft long, and the side wings 79 ft long each Mr Standish Lee, Superintending Engineer, who first prepared a plan for the Ghaut in 1895 had designed the length to be 180 ft in front and 22½ ft at each side This design which is herewith enclosed for kind perusa is in my humble opinion, not sufficiently long at the side wings, and the steps designed, having dimensions for the treads and risers different from

ed for the existing steps there and having no protection at the upper and lower sides by masonry walls, are likely to be shifted from their position by the force of the river current

(b) The masonry in the foundation and basement is proposed to be of size stones in mortar with facing of cut stone. The walls are designed to be sufficiently thick to resist the force of water during floods.

(c) It is proposed to dismantle the stone mantapam round the Narasimhaswami temple and utilise the stone pillars, beams and slabs for the new Shaut work, the width of each Anukana in the Shaut being allowed to be the same as that of each Anukanam in the mantapam. The required number of stone pillars &c can be sufficiently had from the mantapam. Provision is made accordingly in the Estimate for utilising the available stones from this mantapam

(d) The two side wings are proposed to have seven walls and windows between the pillars and to be converted into halls (for the use of the Royal party when they visit the Shaut) – with rooms at the northern most end for Gods Ganesa and Anjaneya. There will be Viniana Domes constructed over the rooms intended for the Gods, one in each side wing; and there will be also a Viniana in the centre of the mantapam in front.

(e) The cost of the Shaut amounts to Rs 64832/-

III. Bridge – A branch of the river intervenes between the river bank and the Shaut site and so an arched bridge of 3 Vents of 30' span is designed

across this branch The masonry will be of stone throughout except the blocking course and the parapets which will be of brick in mortar The width of the road way over the bridge is allowed to be 12 ft to facilitate the taking of the Road to the Ghaut Mantapam for the Pooravam &c. The North wing is proposed to be 56 ft long and to connect the north abutment of the bridge with the face of the Ghaut Mantapam in front, so that the Ghaut and the Bridge may form one continuous masonry The Bridge is estimated to cost Rs 13,470/-.

IV Chattram - This is designed to be something like a Travellers' Bungalow, but in an improved style This is proposed to have two floors with terraced roofs except for the 2 Verandahs in the first floor which will have Bengal terraced roofs over Two out-houses, one for the use of Brahmins, and the other for the use of non-vegetarians of other castes are also estimated for to be attached to the new Chattram

The Sandalkoti which is intended to be converted into Musafirkhana for the use of the general public, after it is shifted to Mysore, where a new building is under contemplation to be constructed will cost about Rs 3000/- for conversion into a Musafirkhana But this amount is not now included in the Estimate since it is thought that at least 3 years must elapse before a new Sandalkote is constructed in Mysore and the Seringapatam Kote is shifted there and a fresh Estimate be made, when be sanctioned

V The total cost of the project thus amounts to Rs 94,822 But in the Diwan's Memo dated 5 8 96 of Monuments and Charitable Grants in memory of His Highness the late Maharaja only Rs 60,000/- is allotted for this project

I beg to state that it is not possible to reduce the cost of the project by any means consistent with the safety of the structure and the architectural beauty of the design of the Ghaut and the bridge and also with the accommodation required in the Chatram. I request the favor of early sanction of this project, so that the collection of materials may be put in hand at once and the Ghaut and the Bridge work finished during the next Summer Season.

I have &c

I have to refer to your No. 221/26-96 of the 31st August last requesting to know the progress made on the Construction of a Chattram & a Bathing ghaut at Somnapar in memory of Her Highness the late Maharaja of Mysore

---

I have the honor to inform that a project estimated to cost Rs 94882 for the Construction of a Bathing ghaut & Dharma Chatram has been submitted to the Superintending Engineer, Western Circle for favor of Sanction, as per this office No 214 of 31. 8. 99

V. Arjaswami Ayy
Executive Engineer
Palace Division

From

The Ex Engineer Hm

Palace Divisn Mysore

To the Supdt Engr West Circle

Dated 10th November 1879.

Sir,

In continuation of this Office No 214 dated 31st Aug'79, I have the honor to request you will be good enough to give me permission for collecting necessary ~~from~~ materials for the construction of the Chatram and Bathing Ghaut at Srirangapatam. The Cauvery River has gone down now good deal and this is the best season for starting the foundation of the Ghaut and pushing on with the masonry work there

It is not possible to go on with the work in the river bed from the month of April next, since river will then begin to rise. All the work that we have to do here to be done in three fine months, it from November to March So, I request you will permission for the collection

materials.

I have the
honour to be

Dy 3/96
Bangalore

Some work for diverting the stream
in the hot weather the river at
the foot of the Ghat will be a
dry bed But a very costly bridge
has been erected & without a Ghat
the expenditure already incurred
will be a sheer waste.

Another objectionable feature
is the use of the temple stones for
which very extensive mandaps
of Narasimhaswami ~~were~~ were
were demolished. It was stated
by Mr Ramgarao Esq[r] that
no one visited the temple - but
on both the occasions of my visit
there were loud complaints of the people -
and it is beyond doubt that such
works of destruction even when prompted
by good & charitable motives
of providing a Ghat in a sacred river
do not secure the peoples' approval.
It is a pity that for this commemorative
work these stones were ordered to be used.
I hope the Dy will assure himself
that permission for this was given

Upon the Tank Bund on the Nagar
It is now impossible to restore these
ancient works. But the nearest approach
is nearest to it is to repair the main
temple in such a way that it may resist
weather proof & continue in a sound
condition for some time more.
An estimate for this and also for
improving the building in such a way
as to admit more light and air into it
should be prepared. The amount
required to carry out this work must be
saved out of the ~~work~~ estimate for
the Ghat. The Mantapam over the Ghat
must for the present be abandoned. The
size of the Ghat itself must be reduced
by one half and the estimate prepared
accordingly. When these are submitted fresh
orders will be passed - & the work may in
the meanwhile proceed in accordance
with the views above set forth.

G.M. 45-06-15

1. As the design sent
by Mr. Thornton of
Calcutta for the glass
canopy over the
Brindavanam has
been adopted by the
Chief Engineer, no further
orders are needed on
this point.

2. As regards glass
doors to the ante room
the proposal of the
Chief Engineer to obtain
English plate glass

door with gun mess-
frame is approved.

3. An establishment consisting of one watch-man and one head gardener at Rs 11/- each per mensem and one under-gardener on Rs 9/- a month may be entertained. The cost of the above Establish-ment will be a charge on the State Funds and will be provided for under General Adminis-tration

4. As regards uniform to the Establishment it will be sufficient if the watchman is given a dark Coat, belt and badge as supplied to Government Peons. No uniform is required in the case of Malies or gardeners.

5. An annual

allotment of Rs 1000/-
for the maintenance
of the Memorial works
at Calcutta is sanctioned
to be provided for
from the ordinary
P. W. grant.

6. Regarding the
Tipperah Memorial
the ordinary repairs
required for the
building such as
white & color washing
and plastering con-
templated in the
order of the 2nd
April 1907 read above
seem to be all that
is necessary and
may be carried out
at the expense of
this State. Further
instructions on
this point will be
issued after the
consent of the
State

is obtained to this arrangement.
